微積分A下(統計系)預習測驗 #16

1. If a transformation T is given by $x = x(u, v), y = y(u, v)$, what is the Jacobian of T?

2. How do you change variables in a double integral?

3. How do you change variables in a triple integral?

1. If a transformation T is given by $x = x(u, v), y = y(u, v)$, what is the Jacobian of T?
